

Virtual Office Meetings

Meetings often take up a big part of the business day. A single app experience takes collaboration to a new level.

Now 8x8 Virtual Office offers you the power to meet with anyone, anywhere at the click of a button—without sacrificing the personal contact you need for effective collaboration.

Meet Face-to-Face in HD Video and HD Audio

8x8 Virtual Office Meetings optimize face-to-face web conferences with industry-leading HD 1080p video and HD audio technology. When bandwidth is constrained, 8x8's resilient HD video automatically adjusts to deliver high resolution and fidelity with low latency—even over Wi-Fi and the public Internet.

Built into Virtual Office for Seamless, Instant Collaboration

As an integral part of 8x8's Virtual Office suite, Virtual Office Meetings allow instant collaboration. You can schedule and even initiate meetings on the fly from within your Virtual Office desktop or mobile app. There's no need to launch—or manage—a separate meeting application.

The plug-in for Microsoft Outlook calendar provides simple one-click meeting scheduling. And initiating instant meetings is just as easy. With a single click, you can seamlessly move from one form of communication to another by turning an instant message (IM) into an impromptu video collaboration session!

While in your meeting, you can take advantage of Virtual Office's integrated Presence indicator to see who else is available and invite them to join. Without ever leaving the application, you can email, IM or even dial additional participants directly into your meeting.

Features

- HD video and HD audio
- Mobile collaboration
- Initiate instant meetings and invite participants on the fly
- Public and private chat capabilities
- Flexible screen-sharing capabilities
- Dynamic content rendering for optimal screen-sharing experience
