

RingCentral Office® Essentials™ Edition

Unlike traditional on-premises systems, RingCentral delivers flexible and scalable business communications and collaboration solutions to meet your company's ever-evolving needs, regardless of your size, locations, devices, or budget. Empower your business to communicate, collaborate, and connect via voice, team messaging and collaboration, and video conferencing, from any location and on any device.

Use RingCentral Office Essentials edition as your unified communications and collaboration solution and enjoy:

- Streamlined communications through a rich set of capabilities
- An open platform that integrates with today's leading business applications
- Simplified provisioning, activation, and communications management
- Unparalleled ease of use
- Ultimate mobility and access
- Cost-effective, subscription-based pricing
- 100 toll-free minutes
- State-of-the-art Plug & Ring® ready phones
- Enterprise-class security and reliability

Seamless transition

By eliminating the need for complex hardware, lengthy installation, and technical expertise, RingCentral gets you set up and running within minutes, not weeks. We provide comprehensive onboarding, training, and 24/7 support services to ensure a worry-free transition for all your end users.

Powerful phone system

RingCentral's cloud-based phone system runs on your high-speed internet and enables your employees to efficiently communicate with their internal and external partners. Easily configure and manage your Auto-Receptionist, dial-by-name corporate directory, employee and department extensions, and much more.

Team collaboration

Use RingCentral Meetings™ to hold high-definition video conferences with up to four participants, utilizing advanced collaboration features including screen sharing, web sharing, file annotation, and more. RingCentral Glip® provides a single, unified team workspace that allows your employees to share conversations, files, tasks, and calendars. Bring internal and external teams together with real-time text, voice, and video conferencing and keep projects on track by setting action items and timelines.

Mobile integration

RingCentral Mobile® empowers your workforce to make and receive calls on iPhone®, iPad®, and Android™ devices with their RingCentral business numbers, send and receive text messages, host and join online meetings, get notifications of voice activity, and much more.
